Local admins' functionalities for localizing the texts and activation / deactivation of product and category data for respective markets

04 Mobile App End Users

Installation guide for end user mobile subscribers – google store location and basic usage options

Part 1

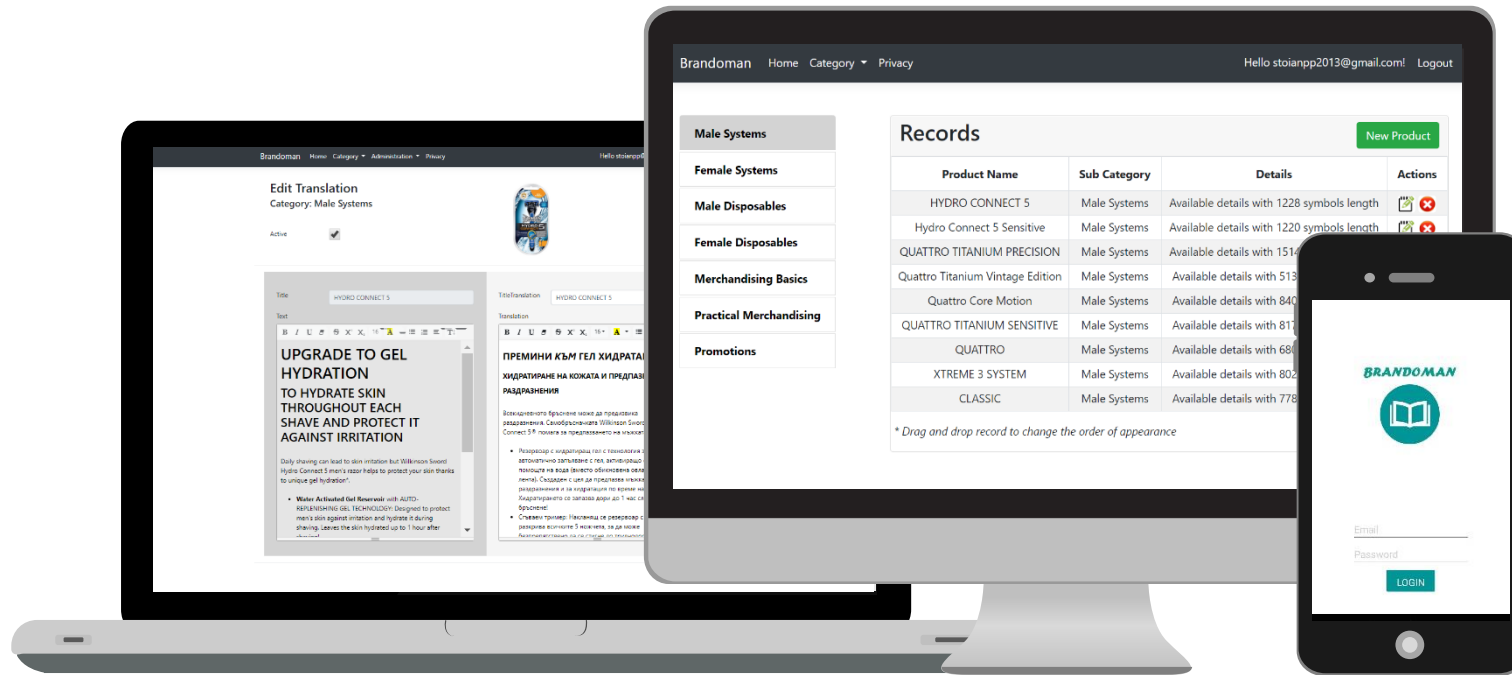

Basic Brandman Information

Product description, content and purpose. Addresses for admin panel access and app stores installations for Android end users

What is it all about?

Brandoman

Online brand and category manual for sales and marketing people

There is so much useful information about our brands and categories we operate in, that we could share with sales representatives and brand people in all markets and countries we exist.

It usually takes a lot of time and valuable recourses to achieve that – catalogs, local translations, regular updates and additions, expensive prints... And all that through heavy communication flow and under the usual time pressure.

A simple on-line tool open for continuous centralized editions and “live” localization could be the optimal solution. That is the new BrandomanEPC tool.

Local Monthly Promotions

Quick and immediate way to announce “Live” any promotion to sales representatives

Updated Product Catalog

Continuously updated information brand and product information

Merchandising Guide

Permanently available and updated merchandising rules and priorities in local language

Users' activity report

Reports of users activity for particular time period allowing to track the usage of the application

How Does It Work

Global Admins

Those are mainly HQ situated marketing managers and/or specific field Edgewell employees with broad knowledge and responsibilities.

Access point: <http://stoianpp-001-site2.htempurl.com>

Local Admins

Those are the local distributor or Edgewell resources that will chose which articles to be visible for local organization plus provide translations for them.

Access point: <http://stoianpp-001-site2.htempurl.com>

End Users

End users are the actual “consumers” that will benefit by the information provided. Application is currently available for installation for Android user with version 6.1+. Version for iOS will be available by October 1st.

Global Information by “Global Admin”

“Global Admin” users enter centrally the basic information in English that needs to be communicated to all markets. It includes products by category, merchandising rules, assortment recommendations and any other useful info available.

Localization by “Local Admin”

“Local Admin” user will be responsible for creating and deleting local End Users of the mobile application. They will also activate/deactivate products and articles for their respective market and will provide translation for them, plus local monthly promotion descriptions.

Application Users

End /Application users can use the application after installing in from GooglePlay store - “BrandomanEPC” They can connect using the credentials provided by their local admins.

Different View Per Each User Type

The collage illustrates three distinct user views of a product management system:

- Left View (Global Admin):** A desktop interface showing a table of product records. The table has columns for Product Name, Sub Category, and Details. The records include various models like HYDRO CONNECT 5, QUATTRO TITANIUM PRECISION, and XTREME 3 SYSTEM.
- Middle View (Admin users):** A desktop interface showing a product detail page for 'HYDRO CONNECT 5'. It includes a title translation, a detailed description in Bulgarian, and a list of features.
- Right View (End Users):** A mobile app interface showing a product detail page for 'Quattro For Women Bikini'. It includes a title translation, a detailed description in Bulgarian, and a list of features.

LEFT

“Global Admin” enters basic info and pictures

“Admin users” create users, activate products and translate / activate articles

End Users see only localized info concerning them in the mobile up

RIGHT

English Testing Access

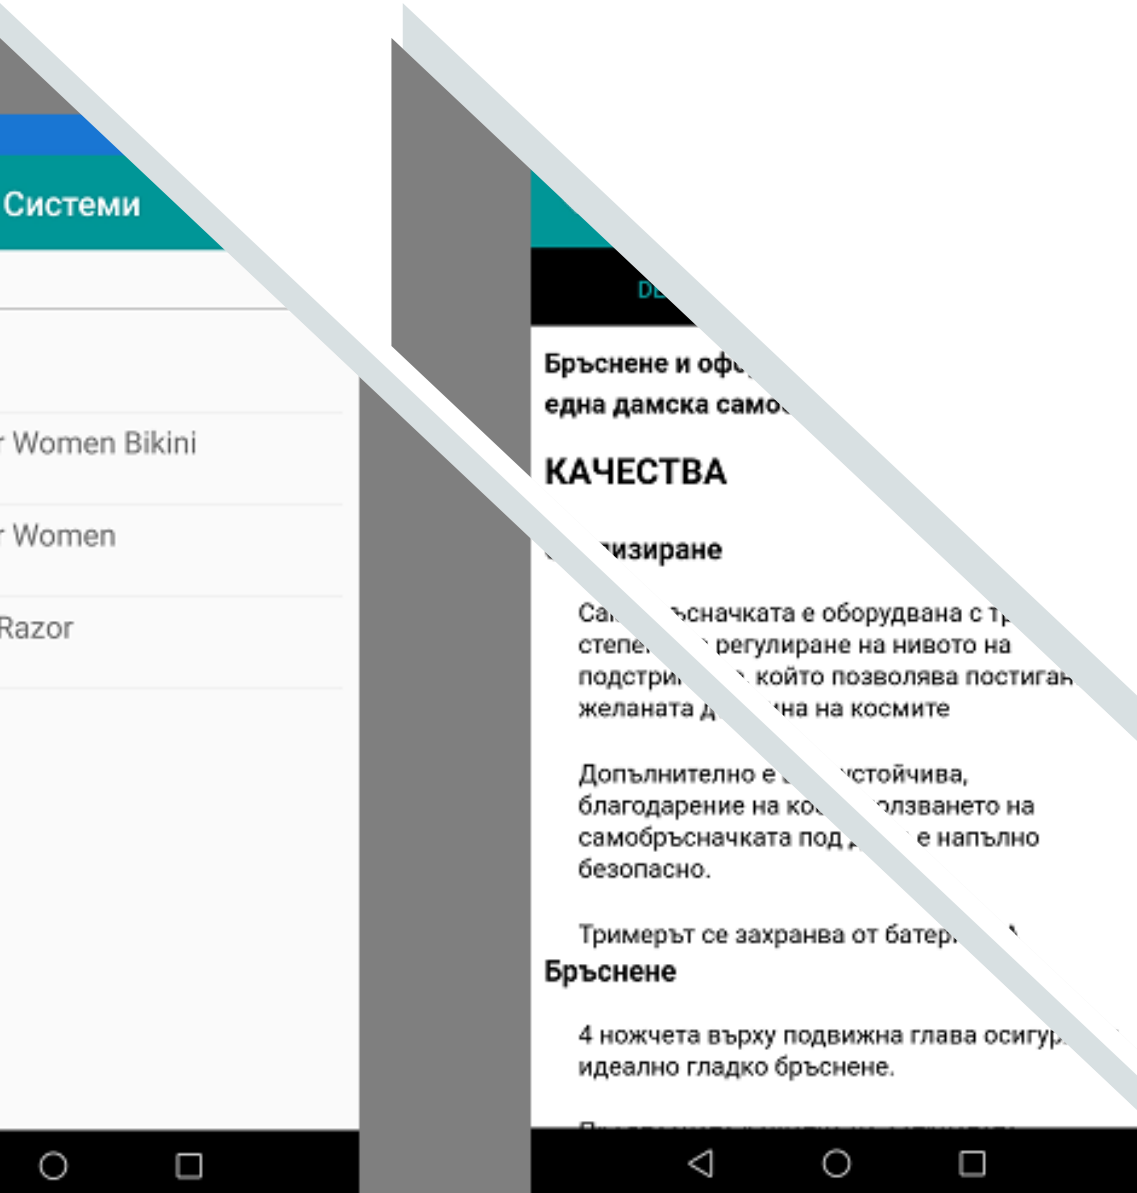

For testing and demonstration purposes Android application data can be accessed using:

Username: test@test.com

Password: Brandoman1!

You need to install the BrandomanEPC application from GooglePlay store beforehand at Android 6.1+ device.

NO IMAGE
FOUND

Creating a new record:

You should give a correct name and details, minimum 3 characters each. From the option menu chose the category you want product to be recorded in, while image could be chosen via the “Chose file” button. Preferably, image should be round sized and with not very high resolution, as big files can slow down the data loading in the mobile application. Then you simply push ‘Save’ button located at the right bottom side.

Editing of existing record:

You can change the name and details of the article, minimum 3 characters each. From the option menu you can also change the category of the product, while image could be changed via the “Chose file” button. Preferably image should be round sized and with not very high resolution, as big files can slow down the data loading in the mobile application. Then you simply push ‘Save’ button located at the right bottom side.
